Monasticism was the dominant form of religious life both in the medieval West and in the Byzantine world. Latin and Greek Monasticism in the Crusader States explores the parallel histories of monasticism in western and Byzantine traditions in the Near East in the period c.1050–1300. Bernard Hamilton and Andrew Jotischky follow the parallel histories of new Latin foundations alongside the survival and revival of Greek Orthodox monastic life under Crusader rule. Examining the involvement of monasteries in the newly founded Crusader States, the institutional organization of monasteries, the role of monastic life in shaping expressions of piety, and the literary and cultural products of monasteries, this meticulously researched survey will facilitate a new understanding of indigenous religious institutions and culture in the Crusader states.

The #1 New York Times bestselling memoir of U.S. Navy SEAL Chris Kyle, and the source for Clint Eastwood's blockbuster movie which was nominated for six academy awards, including best picture. From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.
