Looks at the cultures of the Olmec, Zapotec, Maya, Toltec, and Aztec, examines the remains of their cities, and tells how archaeologists interpret the ruins

William Ferguson's classic photographic portrayal of the major pre-Columbian ruins of Mexico, Guatemala, Belize, and Honduras is now available from UNM Press in a completely revised edition. Magnificent aerial and ground photographs give both armchair and actual visitors unparalleled views of fifty-one ancient cities. The restored areas of each site and their interesting and exotic features are shown within each group of ruins. The authors have thoroughly revised the text for this new edition, and they have added over 30 new photographs and illustrations as well as a completely new chapter by Richard E. W. Adams on regional states and empires in ancient Mesoamerica. Over a span of three thousand years between 1500 B.C. and A.D. 1500 great civilizations, including the Olmec, Teotihuacan, Maya, Toltec,

Zapotec, and Aztec, flourished, waned, and died in Mesoamerica. These indigenous cultures of Mexico and Central America are brought to life in Mesoamerica's Ancient Cities through stunning color photographs. The authors include the most recent research and most widely accepted theoretical perspectives on Mesoamerican civilizations. Ideal for the general reader as well as scholars of Mesoamerica, this volume makes a significant contribution to our knowledge of the Americas.

Born in France, Charnay (1828–1915) travelled extensively through commissions from the French government and with private patronage. He made several visits to the region between 1857 and 1886, producing in his work both a journal of his adventures and an archaeological examination of past civilizations. Beginning in Mexico, Charnay notably examines the ancient city of Tula and also the history of Yucatán, discussing aspects of Toltec and Mayan culture. He explores the ruins of Chichen Itza, Kabah and Yaxchilan (which Charnay dubbed 'Lorillard Town' after a benefactor), among many other settlements. Surveying art, pyramid architecture, ancient customs and history based on extant sources, this account was a major contribution in its field and remains of interest to scholars of Latin American archaeology.

Published by the Field Columbian Museum, this book is an

archaeological study of the ancient sites of Mexico.

The Aztecs ruled much of Mexico from the thirteenth century until the Spanish conquest in 1521. Outside of the imperial capital of Tenochtitlan, various urban centers ruled the numerous city-states that covered the central Mexican landscape. *Aztec City-State Capitals* is the first work to focus attention outside Tenochtitlan, revealing these dozens of smaller cities to have been the central hubs of political, economic, and religious life, integral to the grand infrastructure of the Aztec empire. Focusing on building styles, urban townscapes, layouts, and designs, Michael Smith combines two archaeological approaches: monumental (excavations of pyramids, palaces, and public buildings) and social (excavations of houses, workshops, and fields). As a result, he is able to integrate the urban-built environment and the lives of the Aztec peoples as reconstructed from excavations. Smith demonstrates the ways in which these city-state capitals were different from Tenochtitlan and convincingly argues that urban design is the direct result of decisions made by political leaders to legitimize their own power and political roles in the states of the Aztec empire.

Download File PDF Cities Of Ancient Mexico

First comprehensive English-language book on the largest city in the Americas before the 1400s. Teotihuacan is a UNESCO world heritage site, located in highland central Mexico, about twenty-five miles from Mexico City, visited by millions of tourists every year. The book begins with Cuicuilco, a predecessor that arose around 400 BCE, then traces Teotihuacan from its founding in approximately 150 BCE to its collapse around 600 CE. It describes the city's immense pyramids and other elite structures. It also discusses the dwellings and daily lives of commoners, including men, women, and children, and the craft activities of artisans. George L. Cowgill discusses politics, economics, technology, art, religion, and possible reasons for Teotihuacan's rise and fall. Long before the Aztecs and 800 miles from Classic Maya centers, Teotihuacan was part of a broad Mesoamerican tradition but had a distinctive personality that invites comparison with other states and empires of the ancient world.
