The major religions of the world are a mystery to many high school teens. Now you can help them unlock the doors of these traditions with our new text, *World Religions: A Voyage of Discovery*. The book is an introductory survey that helps eleventh and twelfth graders understand the people, dimensions, and religious principles of the world's major religions. The textbook includes a chapter on each of eleven major world religions, including Christianity, Islam, Hinduism, Buddhism, Judaism, and others. The text offers the Catholic perspective on interreligious dialogue, an overview of basic questions that religions address, and Ninian Smart's seven dimensions of religion. A glossary and word pronunciations in each chapter help students learn unfamiliar terms. In addition, the second edition of this text incorporates the following new features: a new chapter on modern trends in religion; new, more detailed maps; a new section on the Aztec religion of Mesoamerica; a sidebar in each chapter offering examples of the seven dimensions of religion; and review questions at the end of each chapter.

This book can be used by lay readers as well as students of Short and Full GCSE Courses in Hinduism. Every section has a special section entitled Breadth of Vision that offers deeper insights into religious teachings. This book places a greater emphasis on contemporary version of Hinduism, in contrast to what have now become antiquated versions. Hinduism is a living religion, constantly evolving and refreshing the message of spirituality through the teachings of its contemporary proponents. Western authors writing on Hinduism have often overlooked this feature. Many textbooks on Hinduism are Abrahamic Versions of Hinduism; this book presents a Hindu version of Hinduism focusing on its core teachings of: \* The divinity of Man ~ or Spiritual humanism \* Religious Pluralism promoted as a central tenet of religion \* Religion reconciled with rationality \* Emphasis on experiential religion \* Spirituality as the common subject matter of both religions and modern sciences

This book is the result of a NATO sponsored workshop entitled "Student Modelling: The Key to Individualized Knowledge-Based Instruction" which was held May 4-8, 1991 at Ste. Adele, Quebec, Canada. The workshop was co-directed by Gordon McCalla and Jim Greer of the ARIES Laboratory at the University of Saskatchewan. The workshop focused on the problem of student modelling in intelligent tutoring systems. An intelligent tutoring system (ITS) is a computer program that is aimed at providing knowledgeable, individualized instruction in a one-on-one interaction with a learner. In order to individualize this interaction, the ITS must keep track of many aspects of the learner: how much and what he or she has learned to date; what learning styles seem to be successful for the student and what seem to be less successful; what deeper mental models the student may have; motivational and affective dimensions impacting the learner; and so on. Student modelling is the problem of keeping track of all of these aspects of a learner's learning.

For billions of people, having a religious belief system provides purpose in life. For some, religion serves as a guide for moral behavior. Today's world is one in which our understanding of world religions is both understatedly important, as well as increasingly complex. After many years exploring the foundations of various world religions, Jason Boyett has written this comprehensive, easy-to-understand exploration of the twelve major world religions through a meticulous, yet unbiased lens. 12 Major World Religions offers an impartial look at where each of these belief systems intersects, how they differ, and why some have been or are currently misunderstood.

An essential guide to religion that explores and explains the history and key teachings of the world's five main religions--Christianity, Islam, Hinduism, Buddhism, and Judaism--alongside newer faiths. Baffled by Buddhism? Confused by Catholicism? Mystified by Mysticism? Discover everything you need to know about the world's major religious faiths. World Religions examines the central practices, important figures, and key teachings of many different religions, from Zoroastrianism--the oldest "living" religion--and the great faiths practised today, to newer religions such as Scientology. Each of the major faiths--Christianity, Judaism, Hinduism, Buddhism, Jainism, Sikhism, and Islam--is examined in detail through its sacred texts, epic imagery, key beliefs, and religious artifacts. Modern alternative religions and spiritual beliefs from around the world are also explored and set into the context of the political, social, and cultural climates from which they emerged. Compelling and accessible, World Religions is the perfect guide for students of religious study, or anyone interested in the ideas of ancient and present day faiths and religious philosophies.

Traditionally, university students have gained access to world religions by reading primary texts. Discovering World Religions at 24 Frames Per Second takes students beyond the written page, offering an exploration of the same religious traditions through the study of feature films. The many definitions of religion are examined along with its various components, including doctrine, myth, ethics, ritual, and symbol. Specific religious traditions, including Hinduism, Sikhism, Zoroastrianism, Buddhism, Confucianism, Daoism, popular religion, and Shinto are examined. Biographical sketches of directors whose films tend to focus on a particular religious tradition are also included, such as Zhang Yimou, Hayao Miyazaki, Deepa Mehta, and Akira Kurosawa. Discovering World Religions at 24 Frames Per Second is unique in the area of religion and film studies in that it isn't just a collection of essays. Instead it provides the introductory student with the necessary background information on the various religions before looking at how their ideas can be understood not through texts but through the cinematic medium. To keep the conversation fresh, most of the films used in the book were made within the last decade. Furthermore, examples range from popular, mainstream fare, such as Star Wars and the Lord of the Rings trilogy to lesser-known foreign films, such as The Wooden Man's Bride and The Great Yokai War. Several films with a 'cult-like' following are also discussed, including Fight Club, Princess Mononoke, Spirited Away, and Jacob's Ladder. This book is also unique in that instead of drawing upon the Judeo-Christian tradition, it draws from Eastern traditions.
