certain drilling, completion, or well work operations may include stripping to eliminate the necessity of loading the well with fluid.

## STRIPPING OPERATIONS - Drilling Manual

General Drilling Operations. THE DRILLING PROCESS. After a workpiece is laid out and properly mounted, the drilling process can begin. The drilling process, or complete operation, involves selecting the proper twist drill or cutter for the job, properly installing the drill into the machine spindle, setting the speed and feed, starting the hole on center, and drilling the hole to specifications within the prescribed tolerance.

Level 2 NVQ in Land Drilling Operations - Land Driller ...

Drilling is the operation of producing a cylindrical hole by removing metal from the rotating edge of a cutting tool called the drill. The drilling is one of the simplest methods of producing a hole. Before drilling the centre of the hole is located on the workpiece by drawing two lines at right angles to each other and then a centre punch is used to produce an indentation at the centre.
