OECD's 2013 Economic Survey of Greece examines recent economic developments, prospects and policies. Special chapters cover restoring growth and fairly sharing the social impact of the crisis.

Since World War II, a growing number of jurisdictions in both the developing and industrialized worlds have adopted progressive constitutions that guarantee social and economic rights (SER) in addition to political and civil rights. Parallel developments have occurred at transnational level with the adoption of treaties that commit signatory states to respect and fulfil SER for their peoples. This book is a product of the International Social and Economic Rights Project (iSERP), a global consortium of judges, lawyers, human rights advocates, and legal academics who critically examine the effectiveness of SER law in promoting real change in people's lives. The book addresses a range of practical, political, and legal questions under these headings, with acute sensitivity to the racial, cultural, and gender implications of SER and the path-breaking SER jurisprudence now emerging in the "Global South". The book brings together internationally renowned experts in the field of social and economic rights to discuss a range of rights controversies from both theoretical and practical perspectives. Contributors of the book consider specific issues in the litigation and adjudication of SER cases from the differing standpoints of activists, lawyers, and adjudicators in order to identify and address the specific challenges facing the SER community. This book will be of great use and interest to students and scholars of comparative constitutional law, human rights, public international law, development studies, and democratic political theory.

Economics Model Paper (2014-15) Strictly according to the latest syllabus prescribed by Central Board of Secondary Education (CBSE), Delhi, BSEB, JAC & other State Boards & Navodaya, Kendraya Vidyalayas etc. following CBSE curriculum based on NCERT guidelines, Chapterwise Question Bank with Solutions & Previous Year Examination Papers Economics. 1. This book draws attention to supplementary education, which is growing in many parts of the world, but often goes unrecognized for what it is: a hidden form of privatized education. It provides 'big picture' analyses to comparatively explain the intensity, authority and policy contexts of supplementary education

The 2013 volume of Contemporary Issues in International Arbitration and Mediation: The Fordham Papers 2013 is a collection of important works in the field written by the speakers at the 2013 Fordham Law School Conference on International Arbitration and Mediation, held in New York.

New Economic Constitutionalism in Europe focuses on the institutional mutation of constitutionalism following the major economic crisis in the Eurozone and globally. The main axis is that a new economic constitutionalism has arisen which trespasses on the conventional conceptual foundations and needs to be addressed with novel institutional vehicles. The author proposes an original and searching analysis of the significant constitutional evolutions that have taken place in member states in response to the global financial crisis. The book combines a sophisticated theoretical model of a new form of economic constitutionalism with detailed practical argumentation. This important new work provides a valuable addition to the understanding of this hugely important topic.

Macroeconomics in Context: A European Perspective lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. With a clear presentation of economic theory throughout, this latest addition to the bestselling "In Context" set of textbooks is written with a specific focus on European data, institutions, and historical events, offering engaging treatment of high-interest topics, including sustainability, Brexit, the euro crisis, and rising inequality. Policy issues are presented in context (historical, institutional, social, political, and ethical), and always with reference to human well-being. This book is divided into four parts, covering the following key issues: The context of economic analysis, including basic macroeconomic statistics and tools; The basics of macroeconomic measurements, including GDP, inflation, and unemployment, as well as alternative measures of well-being, and the particular structures of the European economies; Methods for analyzing monetary and fiscal policy, including an in-depth coverage of the instruments and approaches of the European central bank and some coverage of an open economy; The application of the tools learnt to selected macroeconomic issues, such as the euro crisis, the global financial crisis, public debt, global development, and environmental sustainability. Far more than any other existing macroeconomic textbook, this book combines real-world relevance of the topics covered with a strong focus on European institutions and structures within an approach that explains multiple economic paradigms. This combination helps to raise students' interest in macroeconomics as well as enhance their understanding of the power and limitation of macroeconomic analysis. Visit <http://www.bu.edu/eci/education-materials/textbooks/macroeconomics-in-context-a-european-perspective/> for online resources for both lecturers and students. A video of a panel discussion about the book can be found at <https://youtu.be/xjHrW9WP44>.
