Written in an informal, accessible style, author Craig E. Johnson takes an interdisciplinary approach to leadership ethics while blending research and theory with practical application. This unique text promotes ethical decision-making and action through skill development, self-assessment, and application exercises. In the Fourth Edition:

- A new chapter, Ethical Crisis Leadership, explains five ethical principles and strategies that are essential to fulfilling moral duties during times of crisis.
- 'Leadership Ethics at the Movies' features present short summaries of feature films that portray ethical dilemmas. Discussion starters are included to prompt readers to draw ethical implications and applications from the films.
- 'Self-Assessment' features measure the reader's performance on an important behaviour, skill, or concept discussed in the chapter
- 'Implications and Applications' review key ideas and their ramifications for the reader as a leader
- 'For Further Exploration, Challenge, and Assessment' encourages readers to engage in extended reflection and self-analysis
- 'Focus on Follower Ethics' boxes that broaden coverage of the text and introduce concepts students can apply to their role as followers
- Three cases per chapter offer real-world examples for analysis and reflection
- A lengthy reference section at the end of the book serves as a starting point for further research and exploration

Instructors Resources include teaching strategies, a test bank, sample syllabi, assignment descriptions, and more.

Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in

these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.
