This is a dynamic 2 day course where you will have lots of scope to experiment with enamelling techniques on a range of materials. You will learn to sift powdered enamels onto copper sheet. You can try blending colours, you can use stencils to give definition, and you can draw through it to produce unique patterns and textures.

### ~~Experimental Enamelling Techniques for Jewellery~~

by Lilyan Bachrach. After you learn to apply enamels by sifting, wet packing, brushing on crackle and firing the base coats, you are ready for some of the simple techniques that require only a feel for color. You can design a piece by repeating one technique or learning to combine techniques. If you are enameling samples of the technique on 3" round or square 18 ga copper, one coat of crackle on the back is adequate.

### ~~Enameling Techniques for Beginners — Ganoksin Jewelry ...~~

Enameling Next Steps: 13 Ways to Enhance Your Enamel Jewelry Designs. While I was first learning torch-fired enameling, I did a lot of experiments—propane vs MAPP gas, sifting on vs dunking in enamel powders, opaque vs transparent, copper vs silver vs iron underneath—and even brass, which apparently couldn't be done.
