A hard-hitting inside account of the Fast and Furious scandal—the government-sponsored program intended to “win the drug war” by providing and tracking gun sales across the border to Mexico—from whistle-blower and ATF agent John Dodson. After the terror attacks of September 11, 2001, John Dodson pulled bodies out of the wreckage at the Pentagon. In

2007, following the shooting massacre at Virginia Tech, John Dodson walked through the classrooms, heartbroken, to cover up the bodies of the victims. Then came Arizona. The American border. Ten days before Christmas, 2010, ATF agent John Dodson awoke to the news he had dreaded every day as a member of the elite team called the Group VII Strike Force: a U.S. border patrol agent named Brian Terry had been shot dead by bandits armed with guns that had been supplied to them by ATF. Was this an inevitable consequence of the Obama administration's Project Gunrunner, set in place one year earlier ostensibly to track Mexican drug cartels? Brian Terry's murder would not only change John Dodson's life forever; it would reveal a scandal so unthinkable unpatriotic that it forced President Barack Obama to claim executive privilege and caused Attorney General Eric Holder to be held in contempt of Congress. Federal Agent John Dodson, an ex-military man, took an oath to defend the world's greatest country, and proudly considered himself a walking patriotic example of the American Dream. Brian Terry, ex-military like Dodson, was only forty years old, a family man who served his country by working for the government. Dodson was terrified when the next phone call came, one with the potential to destroy his career, his family, and his life. CBS investigative journalist Sharyl Attkisson asked Dodson to go public with what he knew about Fast and Furious. To Agent Dodson, this meant blowing the whistle. But to the family of Agent Terry, it was a chance to save lives and right a wrong. As he took a fight from the border towns of Arizona to a showdown in the halls of Congress, John Dodson clung to the hope that truth would prevail, that he would be redeemed, and that Brian Terry's death would not be in vain. Like whistle-blowers before him, John would not be welcome back on the job. But he found strength in his conscience, in the support of the American public, and in Senators Darryl Issa

and Chuck Grassley. When his first-amendment rights to publicly tell his story were threatened, the ACLU took up his case. For her report revealing John Dodson as the key whistle-blower in Fast and Furious, Sharyl Attkisson received an Emmy Award for Outstanding Investigative Journalism. Ultimately, John Dodson was cleared by the Inspector General's office, publicly heralded as a hero, and returned to Arizona. Perhaps a lesson gleaned from John Dodson's powerful account is well stated by former Speaker of the House of Representatives Sam Rayburn: "If you always tell the truth, you don't have to remember what you said."

Danger and desire ignite when Charlotte Bates drives straight into a DEA agent's hot pursuit of a drug smuggler. But when the lawman takes Charlie hostage, an electrifying adventure begins....

Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks. Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents

Access Free Fast Justice Dea Fast Series Book 6

are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.
