Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Kylie, haunted by a childhood of violence and abuse, wonders if she could emotionally surrender and physically submit to the smoldering dominance of Jensen in this new novel from the number one New York Times best-selling Breathless trilogy. Original.

This book discusses the under-researched relationship between sentencing and the legitimacy of punishment. It argues that there is an increasing gap between what is perceived as legitimate punishment and the sentencing decisions of the criminal courts. Drawing on a wide variety of empirical research evidence, the book explores how sentencing could be developed within a more socially-inclusive framework for the delivery of trial justice. In the international context, such developments are directly relevant to the future role of the International Criminal Court, especially its ability to deliver more coherent and inclusive trial outcomes that contribute to social reconstruction. Similarly, in the national context, these issues have a vital role to play in helping to re-position trial justice as a credible cornerstone of criminal justice governance where social diversity persists. In so doing the book should help policy-makers in appreciating the likely implications for criminal trials of ' mainstreaming ' restorative forms of justice. Sentencing and the Legitimacy of Trial Justice firmly ties the issue of legitimacy to the relevant context for delivering ' justice ' . It suggests a need to develop the tools and methods for achieving this and offers some novel solutions to this complex problem. This book will be a valuable resource for graduate students, academics, practitioners and policy makers in the field of criminal justice as well as scholars interested in socio-legal and cross-disciplinary approaches to the analysis of criminal process and sentencing and the development of theory and comparative methodology in this area.
