protists, and fungi. The sequence of the lab topics has been reorganized to reflect the closer relationship of the fungi and animal kingdoms. A new lab topic, "Fungi," has been added, providing expanded coverage of the major fungi groups. The "Protists" lab topic has been revised and expanded with additional examples of all the major clades. Both lab topics include suggestions and exercises for open-inquiry investigations. In the new edition, population genetics is covered in one lab topic with new problems and examples that connect ecology, evolution, and

but just aren't sure how to do it? You aren't alone. This book will provide you with both the information and instructional materials you need to start using this method right away. Argument-Driven Inquiry in Biology is a one-stop source of expertise, advice, and investigations. The book is broken into two basic parts: 1. An introduction to the stages of argument-driven inquiry—from question identification, data analysis, and argument development and evaluation to double-blind peer review and report revision. 2. A well-organized series of 27 field-tested labs that cover

Answer Key

molecules and organisms, ecosystems, heredity, and biological evolution. The investigations are designed to be more authentic scientific experiences than traditional laboratory activities. They give your students an opportunity to design their own methods, develop models, collect and analyze data, generate arguments, and critique claims and evidence. Because the authors are veteran teachers, they designed Argument-Driven Inquiry in Biology to be easy to use and aligned with today's standards. The labs include reproducible student pages and teacher notes. The

# Read PDF Investigating Biology Laboratory Manual

Investigations will help your students learn the core ideas, crosscutting concepts, and scientific practices found in the Next Generation Science Standards. In addition, they offer ways for students to develop the disciplinary skills outlined in the Common Core State Standards. Many of today's teachers—like you—want to find new ways to engage students in scientific practices and help students learn more from lab activities. Argument-Driven Inquiry in Biology does all of this even as it gives students the chance to practice reading, writing,
