The teacher's resources are available on CD-ROM in a fully customizable format.

This series is focused on delivering custom materials which are designed and presented to meet the needs of enthusiastic and committed students. The resources are written at an average reading ability level, but with full and proper use of scientific terminology throughout. Ascent! has its own text-linked website: www.nelsonthornes.com/ascent

This student book covers Levels 4-7 and is structured to match the sequence of the QCA Scheme of Work Units, and the National Framework for Science Guidelines. Each lesson can commence with a really quick starter activity. The teacher support materials, of course provide hundreds more! Scientifica aims to provide just the right proportion of 'reading' versus 'doing'. There is enough text on each page for students to develop their literacy skills, but each lesson spread also contains an optional activity or two to access the real experience of Science. Ideas and Evidence articles are presented in each text in a more magazine style. [Click here to go to the Scientifica dedicated web site](#)

Bring your science lessons to life with Scientifica. Providing just the right proportion of 'reading' versus 'doing', these engaging resources are differentiated to support and challenge pupils of varying abilities.

This Spiral Edition Teacher Support Pack offers comprehensive support and guidance, providing the best possible learning experience for your students and saving time for everyone in the department.

Chemistry for grades 9 to 12 is designed to aid in the review and practice of chemistry topics. Chemistry covers topics such as metrics and measurements, matter, atomic structure, bonds, compounds, chemical equations, molarity, and acids and bases. The book includes realistic diagrams and engaging activities to support practice in all areas of chemistry. The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series will be aligned to current science standards.

Touted as the most successful NSF-funded project published, Chemistry in the Community (ChemCom) by the American Chemical Society (ACS) offers a meaningful and memorable chemistry program for all levels of high school students. ChemCom covers traditional chemistry topics within the context of societal issues and real-world scenarios. Centered on decision-making activities where students are responsible for generating data in an investigating, analyzing that data and then applying their chemistry knowledge to solve the presented problem. The text is intensively laboratory-based, with all 39 of the investigations integrated within the text, not separate from the reading. With the ChemCom program, students learn more organic and biochemistry, more environmental and industrial chemistry, and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life. Meticulously updated to meet the needs of today's teachers and students, the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next
