Mastering Chess and Shogi by Self-Play with a General Reinforcement Learning Algorithm. 12/05/2017 ? by David Silver, et al. ? 0 ? share The game of chess is the most widely-studied domain in the history of artificial intelligence. The strongest programs are based on a combination of sophisticated search techniques, domain-specific adaptations, and handcrafted evaluation functions that have been refined by human experts over several decades.

January 10, 2018 ~ Adrian Colyer. Mastering chess and shogi by self-play with a general reinforcement learning algorithm Silver et al., arXiv 2017. We looked at AlphaGo Zero last year (and the first generation of AlphaGo before that), but this December 2017 update is still fascinating in its own right. Recall that AlphaGo Zero learned to play Go with only knowledge of the rules and self-play.
