~~Results Page 2 About Toddler Observation Free Essays~~

The observation model was an adjusted version of the Tavistock Model for studying infants. The original model observes a baby, an hour a week for the first one or two years of life, within the family home (Fawcett 2009). The observer does not take notes, as it allows them to notice all behaviours, movements and expressions of the child.

Using observations of children at play in your setting, evaluate how you would scaffold the children's learning in the future and improve the quality of play. Using a range of fully completed observations from placements (six in total), evaluate how you would improve the children's learning experiences. Refer to expected "norms" of development (fully referenced) and explain how your knowledge of theories of child development would give you an understanding of how you might scaffold ...
