Open Data White Paper: Unleashing the Potential | The IT ...
The White paper contains measures that embeds a 'presumption to publication' in tax-funded services and ensures easier access to public data. David Cameron, the Prime Minister, has made Open Data a top priority because of the evidence that this public asset can transform outcomes and effectiveness, as well as accountability. There is a good evidence base to support this – a famous example is how, in cardiac surgery, surgeons on both sides of the Atlantic have reduced the number of ...

The White Paper also explores the way in which open data can unlock economic potential by stimulating the creation of new tools and services. The data to be released under the new plans will add to the 9,000 datasets already available via data.gov.uk, a data portal powered by the Open Knowledge Foundation's open-source software CKAN.

UK Government Releases Open Data White Paper and new Data ...
The Open Data Institute and Thomson Reuters have published a new white paper, explaining how to use identifiers to create extra value in open data. Identifiers are at the heart of how data becomes linked. It's a subject that is fundamentally important to the open data community, and to the evolution of the web itself.

Springer Nature published the white paper Practical challenges for researchers in data sharing on 21 March 2018. Based one of the largest surveys of researchers about research data, this report finds widespread data sharing associated with published works and a desire from researchers that their data are discoverable. The survey results confirm and extend recent findings on general data sharing attitudes and behaviour, including those published in the 2017 The State of Open Data Report from ...

It includes survey results of researchers and a collection of articles from industry experts, as well as a foreword from Ross Wilkinson, Director, Global Strategy at Australian Research Data Commons. The report is the third in the series and the survey results continue to show encouraging progress that open data is becoming more embedded in the research community. The key finding is that open data has become more embedded in the research community – 64% of survey respondents reveal they made ...
