This important book captures and shares the lessons from the TPS for future governments and policy makers, and documents the details of implementing a long-term strategy with its innovative approach to policy issues. After providing the rationale for prioritising teenage pregnancy, the book demonstrates evidence for what is effective, both in helping young people avoid unplanned pregnancy and in improving outcomes for young parents. The TPS is analysed against the World Health Organisation's key actions for effective scale-up of adolescent sexual and reproductive health programmes, to offer an important contribution to international understanding of this global public health challenge. Advocating a 'whole systems' multi-agency approach this book translates evidence into clear action, and combines theory and practice with illustrative case studies to demonstrate how to implement policy successfully.
