The Architecture of Computer Hardware, Systems Software and Networking is designed help students majoring in information technology (IT) and information systems (IS) understand the structure and operation of computers and computer-based devices. Requiring only basic computer skills, this accessible textbook introduces the basic principles of system architecture and explores current technological practices and trends using clear, easy-to-understand language. Throughout the text, numerous relatable examples, subject-specific illustrations, and in-depth case studies reinforce key learning points and show students how important concepts are applied in the real world. This fully-updated sixth edition features a wealth of new and revised content that reflects today's technological landscape. Organized into five parts, the book first explains the role of the computer in information systems and provides an overview of its components. Subsequent sections discuss the representation of data in the computer, hardware architecture and operational concepts, the basics of computer networking, system software and operating systems, and various interconnected systems and components. Students are introduced to the material using ideas already familiar to them, allowing them to gradually build upon what they have learned without being overwhelmed and develop a deeper knowledge of computer architecture.

who either play an active role in conducting research or desire to keep themselves updated in the field of knowledge. Keeping this in mind, this edition has been thoroughly revised. The book contains an up-to-date account of the methods and techniques suited to the field of education and other allied disciplines and thus provides an understanding of significant research problems that need to be tackled. The book elaborates the quantitative and qualitative data analysis techniques; use of descriptive and inferential statistics; reporting of the results of research along with the characteristics and uses of historical, descriptive, ethnographic and experimental methods. Case studies form an important part of the text. It also provides priority areas of educational research in India in the context of National Education Policy (1986) and its Programme of Action (1992), UGC, DEC-IGNOU (2006), NCERT (2005), and UNESCO initiatives and policies as well as the Surveys of Research in Education (1997 and 2006). Designed and written mainly for the students of M.A. (Education, Psychology and Sociology), M.Ed. and M.Phil. (Education, Psychology and Sociology), the book will be of immense value to the Ph.D. students and other researchers of Social Sciences, Biological Sciences, Management, Legal Studies, Humanities and Languages.
