Hospital staff and caregivers are regularly exposed to biomechanical overload risk, particularly at spine and shoulder level—a risk factor that will continue to rise with the progressive aging of the population. *Patient Handling in the Healthcare Sector: A Guide for Risk Management with MAPO Methodology (Movement and Assistance of Hospital Patients)* details the analysis of patient handling risk using the MAPO method in different areas of healthcare and helps you develop strategies to mitigate them. Focusing on the organization of work, this approach gives you the tools to: Rapidly analyse the problem Rapidly identify solutions Effectively monitor the results of preventive actions One of the special features of this approach is that it employs tools that allow you to allocate financial resources to estimate what investments are needed to achieve specific results. This means taking the decision-making process out of the hands of ergonomics experts and putting it into those of healthcare facility administrators.

With this work, the topic of Risk Management in Healthcare organizations will be analyzed. It is intended as an integrated process, through which determine and manage the risks that potentially contribute to erode value created by strategic and operational decision taken. The concept of risk is evoked more often, at a global level, to underline that management has the task of considering all risks that could hinder the achievement of pre-established objectives. These risks can question the general strategy pursued by the company, to protect both individual and collectivity. The goal is to develop a security-oriented strategy that improve the perception by the user/patient, about the quality of the services provided. This strategy must be consistent with the acceptable level of risk that the company must consider, to achieve its objectives and its mission. It is also necessary to identify the appropriate tools, to achieve the risk reduction at the desired levels and to ensure the continuous improvement of clinical practice and quality, through the involvement of all clinical and organizational professionals.
