Light []. Light is that range of electromagnetic energy that is visible to the human eye, the visible colors. The optical radiation includes not only the visible range, but a broader range of invisible electromagnetic radiation that could be influenced in its radiation behavior in a similar way as the visible radiation, but needs often other transmitters or receivers for this radiation.

Optics Mirrors; Study Guide. Mirrors. Previous Next . Mirrors. Mirrors are odd creatures. We use them every day and we're never really surprised by what we see unless we happen to wake up to a particularly impressive case of bed head. But when we look at mirrors with our physics eyes, they become both mysterious and surprising. ...
