Building on the 3rd Industrial Revolution, the data revolution dominated by the arrival of computers, digital networks, the Internet and global telecommunications, the 4th is seen as a convergence of the physical, digital and biological worlds.

4th Industrial Revolution requires a paradigm shift for ...

The interests underlying the so called Fourth Industrial Revolution are largely the same as those driving the economic, social and political systems of the previous 400 years: market expansion and a reduction of labour costs through the use of technology. It is these interests, rather than the technologies themselves that are of most importance.
