" Curiosity in research is fundamental to advancing life and science, and solving some of the great challenges we face as a society, " says Professor Edith Heard, FRS". This biologist has made fundamental discoveries surrounding the epigenetic mechanisms governing X-chromosome inactivation (whereby one of the two X chromosomes in females is silenced), a vital process for proper gene expression.

Edith Heard: In order to protect life, we must first ...

Indeed, Prof. Heard is passionate about European research remaining a beacon of scientific excellence and upholding the vital cross-border collaboration that enables major breakthroughs and attracts talented scientists. Researchers should also continue to play an increasingly important role in " bridging the gap between science and society " .
