Tip-Edge is a single wing bracket that does not lose its rotational control. The base is every bit as wide as a twin bracket. The Tip-Edge technique allows you to utilize the maximum prescription built into the bracket for finishing, i.e., 100% bracket expression. No other system can achieve that.

minimally invasive, esthetic approach to straightening the smile. Many Cape Coral, FL, patients find Tip-Edge orthodontics ideal for opening or closing the bite and correcting crooked teeth, crowding and other oral concerns. Tip-Edge orthodontics differ from traditional braces in that the system tips the teeth to their desired position and then uprights the root, as opposed to dredging teeth through the bone.

TIP EDGE □

Dr. Peter Kesling (the inventor of tip-edge), combined the tipping ability of the Begg technique with the control of Straight wire. □ Began with a straight edge bracket and removed two wedges in the slot, which allows the tooth to tip up to 25 degrees.
